**For Immediate Release**

# Kycon Introduces IP67-Rated RJ45

San Jose, CA – Combining the connective networking ease of the Ethernet connector system with industrial-rated protection and Kycon reliability, Kycon now offers an IP67-rated RJ45. The new GM67X series provides quick secure connections for any RJ45 application while safeguarding against harsh environmental influences such as dust and water to protect sensitive equipment. Popular applications include surveillance systems and outdoor telecommunications.

Kycon strives to consistently live up to its award-winning customer service and product quality standards while meeting industry demands for technological advancement. Learn more at www.kycon.com.
