Kycon expands KPJX series with a low profile version

Morgan Hill, CA – *Kycon, Inc.*, is excited to announce the expansion of its KPJX series with the introduction of a new low-profile jack designed to meet the growing demand for compact and flexible electronic designs.

The new KPJX low-profile option features a center height of just 2.6mm, which is 4.5mm lower than the standard KPJX model. This reduction in height allows engineers and designers to achieve optimal functionality while maintaining space efficiency in increasingly smaller form factors. Ideal for designs where space is at a premium, the low-profile jack offers a versatile solution for a wide range of applications.

This new model comes standard with high-temperature material and is designed for reflow soldering processes. The KPJX low-profile jack is also fully compatible with Kycon's KPPX snap-and-lock plug series, enabling secure and reliable connections for a wide range of electronic devices.

Kycon's commitment to quality and innovation continues with this new release, which offers an exceptional combination of performance, durability, and flexibility.

Key Specifications:

- Low Profile version of KPJX-4S
- Center height is 2.6mm - 4.5mm lower than standard KPJX
- Compatible with KPPX-4P Snap and Lock Plugs
- High-temp; intended for reflow applications
- Handles 7.5 Amps per pin
- Tape and Reel packaging
- RoHS and REACH Compliant

Applications:

- Consumer Electronics

Part Number:

KPJXHT-LP-4S-TR

POWER JACK LOW PROFILE, 4 PIN, TAPE AND REEL
